

# VetroFreddo®

L' esaltazione della materia attraverso l'anima del suo colore.

A unique material. Expressive colors.

VetroFreddo is an innovative material composed of glass pigments and resin. Its major characteristics are its versatility in adapting itself to any form or shape imaginable. The material's unique characteristics are expressed through the soul of its color, which can be in transparent, semi-transparent or opaque form, due to the material composition of glass pigments. No limits exist in regards to color. Apart from the existing range of colors, any color from the "RAL" color scheme can be chosen.

VetroFreddo is temperature resistant up to approximately 100C and can be worked with and carved just as marble or glass. All objects designed with the material VetroFreddo can be cleaned with any type of non-granular soap, using soft sponges or tissues.

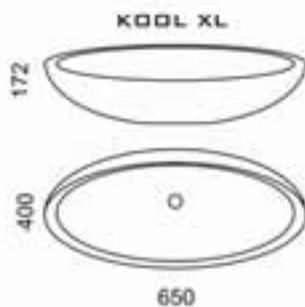

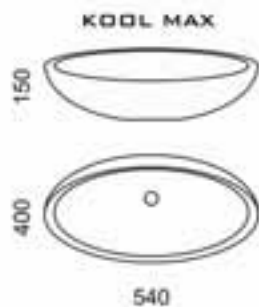

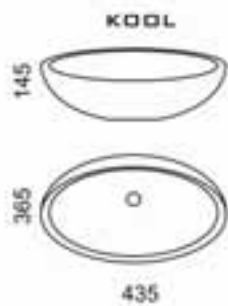

In case of superficial damage (scratches), the damaged area should gently be rubbed with a sheet soaked in olive oil. In case of deeper scratches or damage, a special replacement glass paper is available from the manufacturer for every color and type of object.
